Portfolio

Professional Summary

Java backend-focused full stack software developer with hands-on experience in enterprise systems running in production environments. Skilled in Spring Boot, microservice architecture, REST APIs, authentication, authorization, and data consistency. Worked on feature delivery, bug fixing, testing, and integration processes in live systems using Redis, RabbitMQ, Docker, GitLab, and PostgreSQL.

Technical Skills

- **Programming Languages:** Java, TypeScript, JavaScript, Python, C
- **Backend:** Spring Boot, Spring Security, Spring Cloud Gateway, RESTful APIs, JPA/Hibernate, JWT, Microservices, Redis, RabbitMQ
- **Frontend:** Vue.js, Angular, React, HTML, CSS
- **Databases:** PostgreSQL, SQL, Firebase Firestore
- **Testing & Documentation:** Mockito, Postman, Swagger/OpenAPI
- **Tools & Processes:** Git, GitLab, Docker, Maven, Linux, CI/CD, Agile/Scrum
- **Concepts:** Object-Oriented Programming (OOP), Design Patterns, Clean Code, Layered Architecture

Education

Ostim Technical University

Bachelor's Degree in Computer Engineering

Ankara, Turkey

2021 – 2025

Professional Experience

Basari Mobile

Assistant Software Development Specialist – Backend Developer

Ankara, Turkey

Oct 2025 – Present

Built **2** backend modules for enterprise platforms using Java, Spring Boot, and microservice architecture. Implemented **6** secure REST APIs with JWT-based authentication and authorization through Spring Security.

Designed a centralized API Gateway with Spring Cloud Gateway; handled JWT validation, **multi-tenant** control, service routing, Redis, and RabbitMQ integration tasks.

Supported production development workflows using GitLab, Docker, Mockito, and Postman for feature delivery, bug fixing, testing, and error analysis.

FDN Soft

Java Backend Developer

Ankara, Turkey

Jun 2025 – Jul 2025

Contributed to a Spring Boot microservice focused on authorization structures and secure service-to-service communication.

Refactored existing Java code to improve readability, maintainability, and long-term code sustainability.

Ziraat Teknoloji

Full Stack Developer Intern

Ankara, Turkey

Jan 2025 – Jun 2025

Integrated Angular-based user interfaces with Spring Boot REST services for management and analytics modules.

Enhanced transactional reliability in FinTech scenarios by implementing JWT authentication, Stripe payment integration, and PDF invoice generation.

Created a Flutter-based mobile application with **30** levels using Firebase infrastructure and ran testing sessions with **10** users.

Ziraat Teknoloji

Full Stack Developer Intern

Ankara, Turkey

Jul 2024 – Aug 2024

Built digital banking interfaces with role-based authorization using Angular and Node.js/Express.js. Ensured data consistency and validation for simulated banking transactions on PostgreSQL.

STM

Embedded Software Intern

Ankara, Turkey

Jan 2024 – Feb 2024

Programmed C/C++ embedded software on the TM4C1294XL microcontroller with **1** hardware sensor, using timers, interrupts, and GPIO under real-time constraints. Performed unit-level validation and testing with low-level microcontroller peripherals.

Mobiliz

iOS Developer Intern

Ankara, Turkey

Jun 2023 – Jul 2023

Implemented location-based features for **3** internal iOS applications using Swift, Firebase Authentication, Firestore, and Google Maps API.

Crypttech

Machine Learning & Artificial Intelligence Intern

Istanbul, Turkey

Jan 2023 – Feb 2023

Designed machine learning models and data processing workflows for prediction and comparison tasks using Python and Scikit-learn.

Karel

Embedded Software Intern

Ankara, Turkey

Jun 2022 – Aug 2022

Integrated **2** peripheral sensors into STM32-based systems and built embedded software for data acquisition and serial communication.

Projects

- **n11 TalentHub – N11 Lite E-Commerce Platform:** Built a full stack e-commerce application within the n11 TalentHub program, covering product listing, cart management, and user-focused shopping flows. Took part in sprint-based development with a focus on user experience, modular structure, code quality, and presentation-ready product delivery.
- **Hotel Reservation System:** Created a hotel reservation application using Spring Boot and Angular, including **4** REST APIs, JWT authentication, Stripe-based payment integration, and PDF invoice generation.
- **Banking Web Application:** Implemented a secure banking platform using React and Express.js with **5** role-based authorization features and transactional data consistency on PostgreSQL.
- **AI-Based Disease Risk Prediction:** Trained disease risk prediction models on a dataset of approximately **200,000** samples using Python and Scikit-learn, then visualized the results with Streamlit.

Certifications

- n11 TalentHub Program – n11
- Huawei Cloud DevOps Bootcamp – Huawei / HSD
- TUBITAK BILGEM YTE Bootcamp: Java, Spring, and Microservice Architectures – TUBITAK BILGEM
- Aygaz Machine Learning Bootcamp – Global AI Hub
- Akbank Deep Learning Project Camp – Global AI Hub
